The Withnell Brick & Terra Cotta Co.

(1912), Ltd.,

Abbey Village, Nr. Chorley.

IN placing this, our first, Catalogue before the public, we would respectfully mention that we have recently purchased (as a going concern) the works and premises of the Company known as The Withnell Brick & Terra Cotta Company, Limited, and that under the style of The Withnell Brick & Terra Cotta Company (1912), Limited, we are placing on the market, in as many forms as possible, the FINE RICH SHALES of the WITHNELL district.

The quality of these Shales is a well-known factor in the trade, the products therefrom being undoubtedly unsurpassed by any similar goods manufactured. The Shales are used in their natural state entirely, it being quite unnecessary to add any colouring matter to obtain the brightness and clearness that have received so much commendation. The Bricks are close in texture, very smooth on the face, are practically impervious to moisture, and possess that hard metallic ring characteristic of all good bricks. They are made by the Stiff-Plastic process, and are subjected to great pressure.

We have devised a system of drying entirely new to the trade, enabling us to thoroughly dry all our bricks before burning, preventing the moisture which evaporates from the Shale combining with the sulphurous gases thrown off by the fuel in the firing, and reducing, to a very great extent, the disfiguring scum so objectionable.

It is now generally acknowledged that Engineering Bricks made from a good Red Shale and well burnt are equal in quality and durability to the best blue bricks. Our Engineering Bricks are vitreous throughout, and will withstand enormous pressure.

We
Our good
experien
their good

To p
in contin

October,

We have our own Private Sidings which run round our Kilns. Our goods are packed direct from the Kilns into the wagons by experienced hands, and our customers are assured of receiving their goods with the minimum of handling.

To prevent confusion, this Catalogue will be known as " No. 4 " in continuation of those issued in the past by the old Company.

October, 1912.
